XXXVI ANNUAL MEETING

Italian Association for the Study of the Pancreas (AISP)

Dear Colleagues,

after six years our National Meeting is coming back to Bologna, the hometown of our association.

In the last few years AISP has been growing, true to its mission to promote and encourage the development of science and health in the Pancreatology field.

Although the present economic difficulties, we are trying to keep a high scientific standard of our National Meeting, thanks to the companies who believe in our initiatives and which are giving enthusiastically their support.

The meeting will be held at Savoia Hotel Regency, easily accessible and within walking distance from the center of this charming and historical town.

There will be three days of intensive work and I hope you will find the program challenging. Hot topics will include BD-IPMN management, exocrine and endocrine pancreatic insufficiency treatment after pancreatic resections, new techniques for endoscopic diagnosis and pancreatic tumors' palliation and much more.

I am expecting lively discussions and I hope to revitalize relationships that are precursor for future collaborations.

A warm welcome to all of you in Bologna!

Raffaele Pezilli
